Fertilizer information

Sample 1		
Name	Producer	Country
Other information		
Sample 2		
Name	Producer	Country
Other information		

If available, please enclose the associated product / safety data sheet or delivery note.

Shipping advices

A sample of approx. 2-3 kg is required to determine a setting recommendation. The sample should be taken at various points in the fertilizer storage. Please send the sample well protected against damage and moisture to the above adress.

General information

Determined settings are a recommendation and cannot be guaranteed. Please check them again by pursuing a calibration (dosing rate) and by using a practice test set (cross distribution).

Processing the fertilizer sample takes about 1-2 days after reception and is free of charge.

We are happy to answer open questions at (0049) 7229 / 8580-254 and at testhalle@rauch.de
